PREFACE

This strategy clarifies and sets direction for BLM's interpretive program. It is based on *BLM's Interpretive Guidelines*, *Recreation 2000*, *Recreation 2000 Update*, the *BLM's Blue Print for the Future* and supports the Bureau of Land Management Strategy and the Government Performance Review Act. It will guide the development of effective interpretive programs which supports management goals, serves visitors and protects the public land resources.

Interpretation is a voice for all the resource management programs within the BLM. Although BLM has had some interpretive facilities, programs and products in place since the early 1970s, the program is relatively young. Red Rock National-Conservation Area Visitor Center, completed in 1982, was one of BLM's first visitor centers. That same year, BLM established a partnership with its first interpretive cooperating association. Now the BLM is an active partner in 46 visitor centers, 18 of which BLM owns and manages.

In 1993, the BLM hired its first national lead for interpretive program. BLM's interpretive products have won many awards for the outstanding quality and creative approaches. Many BLM staff members served as officers or on committees in the interpretive professional organization, The National Association for Interpretation.

The BLM's interpretive program focuses on the Nation's public lands and the interrelationship between the physical elements, biological systems, cultural, and historical events. Management issues are addressed within the interpretive story in a way that relates those issues to the visitors experiences. Interpretive planning is done collaboratively with internal and external groups, and clear measurable objectives are established to measure the cost/benefit and the programs effectiveness. BLM's interpretive program aims to respect and serve people with diverse backgrounds and abilities.

Mission Statement

The Bureau of Land Management interpretive program supports the Bureau's mission and goals by serving customers, promoting the health of the land, and enhancing the public's enjoyment, understanding, and appreciation of public lands' natural and cultural resources and their management.
